emma

Elevate your cloud game with the emma multi-cloud management platform

Designed for start-ups to enterprises, emma* streamlines your cloud journey — whether you're starting out or managing a sophisticated multi-cloud system. Unlock unparalleled innovation and seize a competitive edge in today's fast-paced business world.

*emma - enterprise multi-cloud management application

emma offers a comprehensive set of capabilities

Access to cloud services in 50+ regions and 150+ cloud locations

Built-in migration tools

Cloud-native networks

Containers and microservices

AI-analytics and predictions

Single service level agreement

eStore (applications gallery)

Provisioning and orchestration

Inventory and classification

Monitoring and analytics

Cost management and optimization

Compliance and identity control

Networking

Open APIs and CLI

emma's seamless multi-cloud management
for a cloud-agnostic future

From inception to execution, emma provides seamless operations, cost optimization, enhanced connectivity, and robust governance for your multi-cloud endeavors. Replace disjointed tools with crystal-clear visibility and unmatched control.

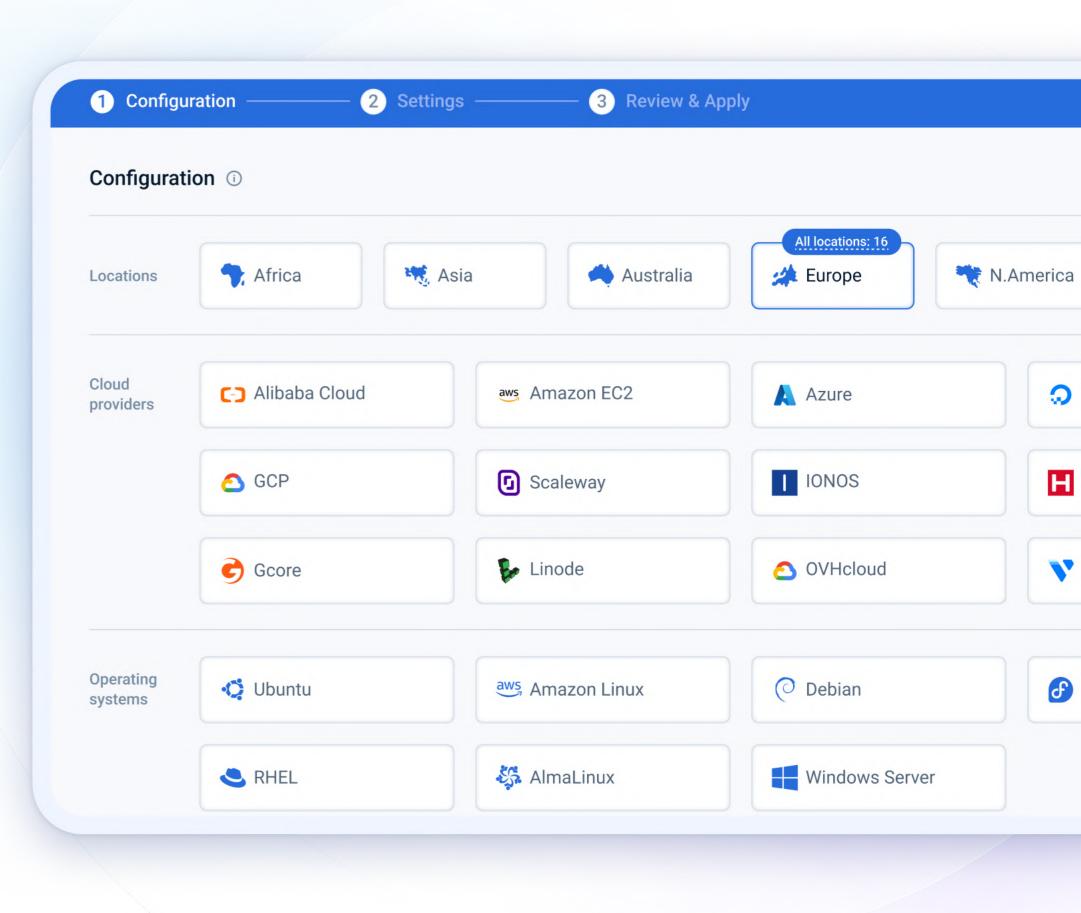

All-in-one

Where many offer piecemeal solutions, emma stands as a holistic answer. Integrating management, financial oversight, seamless networking, and policy enforcement, our platform reduces clutter and paves the way for unprecedented savings of up to 80%.

Complete oversight

Experience a clear view of your entire cloud ecosystem through our unified dashboard. emma allows businesses to track performance, gauge resource usage, uphold security measures, and maintain regulatory standards across every cloud. Harness this comprehensive insight to make informed choices, address challenges swiftly, and uphold a gold standard in operations.

Universal cloud integration

Our platform seamlessly integrates with top cloud providers (AWS, Google Cloud, Microsoft Azure and others, including a private cloud providers), enabling organizations to leverage their strengths without being tied to one platform, staying agile in a fast-evolving industry.

Cost efficiency

Harness real-time insights into cloud expenditures across various providers. With emma, pinpoint savings opportunities, maintain budget discipline, and strategically manage cloud expenses. The outcome: swift deployments, optimal resource allocation, and enhanced business value.

Smart automation

Using machine learning and AI, emma refines multi-cloud operations. It automates tasks like provisioning and scaling, minimizing manual input and boosting productivity. Plus, our optimization tools analyze performance and costs, ensuring you get the most from your resources and see tangible cost benefits.

Seamless connections

emma's cloud networking reshapes multi-cloud connectivity. With our unified network fabric, managing resources across various providers becomes effortless. We ensure secure connections, implement network policies, and optimize traffic routing, building a foundation for resilient network structures. Smooth communication and data transfers between cloud environments are now a given.

Adaptive architecture & growth

emma's modular and extensible design ensures you're ready for the cloud's future shifts. Stay ahead, seamlessly integrate new technologies, and scale multi-cloud endeavors limitlessly. Navigate the dynamic cloud terrain and harness innovations to drive your expansion.
